Contents Volume 125

1 Pure competition, regulated and Stackelberg equilibria: Application to the energy system of Québec
D. Lavigne, R. Loulou and G. Savard

18 An algorithm for the multiparametric 0–1-integer linear programming problem relative to the objective function
A. Crema

25 An extended DEA model: Appending an additional input to make all DMUs at least weakly efficient
E. Takeda

34 An evaluation of vendor selection models from a total cost of ownership perspective
Z. Degraeve, E. Labro and F. Roodhooft

59 ProGen/πx – An instance generator for resource-constrained project scheduling problems with partially renewable resources and further extensions
A. Drexl, R. Nissen, J.H. Patterson and F. Salewski

73 Capturing group preferences in a multicriteria decision
R.F. Easley, J.S. Valacich and M.A. Venkataramanan

84 New bounds for expected cycle times in tandem queues with blocking
K. Nakade

93 Returns to scale and scale elasticity in data envelopment analysis
H. Fukuyama

113 Local stability intervals in the analytic hierarchy process
J. Aguarón and J.M. Moreno-Jiménez

133 Multiaction maintenance subject to action-dependent risk and stochastic failure
C.-T. Su, S.-C. Wu and C.-C. Chang

149 Optimal dynamic pricing of perishable products with stochastic demand and a finite set of prices
R.E. Chatwin

175 Multicriteria assignment method *PROAFTN*: Methodology and medical application
N. Belacel

184 An organizational change perspective on the value of modeling
M.J. Liberatore, A. Hatchuel, B. Weil and A.C. Stylianou

195 Hiring policies in an uncertain environment: Cost and productivity trade-offs
Y. Gerchak and B. Golany

205 Airline spill analysis – beyond the normal demand
M.Z.F. Li and T.H. Oum

216 A note on "Project scheduling with resource constraints: A branch and bound approach"
F. Kaefer

219 Editorial
J. Krarup and D. Pisinger
222 Optimization engineering techniques for the exact solution of NP-hard combinatorial optimization problems
P. Toth
239 Continued fractions in optimal cutting of a rectangular sheet into equal small rectangles
M.Z. Arslanov
249 Analysis of permutation routing algorithms
J. Békési, G. Galambos and P. Hajnal
257 Tabu search for DNA sequencing with false negatives and false positives
J. Błażewicz, P. Formanowicz, M. Kasprzak, W.T. Markiewicz and J. Węglarz
266 Application of the noising method to the travelling salesman problem
I. Charon and O. Hudry
278 The vertex degrees of minimum spanning trees
D. Cieslik
283 Algorithmic approach to the satisfactory graph partitioning problem
M.U. Gerber and D. Kobler
292 Stability in P_5- and banner-free graphs
V.V. Lozin
298 On the capacitated lot-sizing and continuous 0–1 knapsack polyhedra
A.J. Miller, G.L. Nemhauser and M.W.P. Savelsbergh
316 The method of generalized generating sequences
I. Ushakov
324 Scheduling a flowline manufacturing cell with sequence dependent family setup times
J.E. Schaller, J.N.D. Gupta and A.J. Vakharia
340 A mini-line approach for pull production
R.H. Ahmadi and H. Matsuo
359 A genetic algorithm for scheduling staff of mixed skills under multi-criteria
X. Cai and K.N. Li
370 Minimizing makespan subject to minimum total flow-time on identical parallel machines
J.N.D. Gupta and A.J. Ruiz-Torres
381 A comparative evaluation of modeling approaches to the labor shift scheduling problem
T. Aykin
398 A discrete semi-Markov decision model to determine the optimal repair/replacement policy under general repairs
C.E. Love, Z.G. Zhang, M.A. Zitron and R. Guo
410 Hydro-electric unit commitment subject to uncertain demand
A.B. Philpott, M. Craddock and H. Waterer
425 An improved precedence rule for single machine sequencing problems with quadratic penalty
S.A. Mondal and A.K. Sen
429 On improving the single-vendor single-buyer integrated production inventory model with a generalized policy
S.K. Goyal
431 Multi-attribute decision aid under incomplete information and hierarchical structure
B.S. Ahn, K.S. Park, C.H. Han and J.K. Kim
440 On three-machine flow shops with random job processing times
J. Kamburowski

449 Vehicle routing–scheduling for waste collection in Hanoi
D.V. Tung and A. Pinnoi
469 Efficiency of reductions of job-shop to flow-shop problems
A. Guinet
486 An intermodal optimum path algorithm for multimodal networks with dynamic arc travel times and switching delays
A. Ziliaskopoulos and W. Wardell
503 Information and incentives in computing services supply: The effect of limited system choices
E.T.G. Wang
519 A lemons market? An incentive scheme to induce truth-telling in third party logistics providers
W.S. Lim
526 The dynamic predicate stashing copy problem and the Steiner problem in graphs
S. Marsman, C.W. Duin and A. Volgenant
535 Sequencing of jobs in some production system
J. Grabowski and J. Pempera
551 Modelling diffusion and replacement
T. Islam and N. Meade
571 Dimension of valued relations
J.-P. Doignon and J. Mitas
588 The effects of inflation and time-value of money on an economic order quantity model with a random product life cycle
I. Moon and S. Lee
602 Commonality in product design: Cost saving, valuation change and cannibalization
K. Kim and D. Chhajed
622 Benders-and-cut algorithm for fixed-charge capacitated network design problem
V. Sridhar and J.S. Park
633 A decision support system for business process planning
P. Völkner and B. Werners
648 On the single-assignment *p*-hub center problem
B.Y. Kara and B.Ç. Tansel
656 Determining the relative efficiency of MBA programs using DEA
A. Colbert, R.R. Levary and M.C. Shaner
670 Co-plot: A graphic display method for geometrical representations of MCDM
A. Raveh
679 Contents of volume 125
